ABSTRACT

This final project is written based on the job training which has been done from February to March, 2013. The objectives of this final project report are to describe the activities of English teaching and learning to the students of fifth grade of SDN Wonosaren 2 Surakarta, to know the problems of English teaching activities faced by English teacher and to find out the solutions to solve the problems.

By observing the school, interviewing the teachers and students and directly teaching at the fifth grade class, the writer could write the final project report completely. The writer used some procedures in English teaching and learning activity. The activity included pre-activity, main activity and post-activity. The pre-activity consisted of greeting and warming up. The main activity involved explanation, and skill practices. The post-activity involved assessment and ending the lesson.

During the process of English teaching and learning, the writer faced some difficulties, such as students’ wrong opinion about the English lesson, difficulty in understanding the material, classroom management, limited time and media used in teaching English. However, there are some solutions to solve the difficulties: using pictures, repeating in explaining the material, warning to be silent, managing the time well and adding more media. From the discussion in this final project report, we can know the importance of teaching English language to elementary students, because English is a first foundation for them to prepare to the next stages of education.
