

## ABSTRAK

**Zuvita Alfiyani, R0314061. ASUHAN KEBIDANAN BERKELANJUTAN PADA NY. V UMUR 25 TAHUN DI WILAYAH PUSKESMAS GAMBIRSARI SURAKARTA. Program Studi DIII Kebidanan Fakultas Kedokteran Universitas Sebelas Maret Surakarta.**

**Ruang Lingkup:** Asuhan komprehensif pada Ny. V meliputi asuhan kehamilan, bersalin, nifas, neonatus dan Keluarga Berencana dalam upaya untuk menjaga kesehatan ibu dan bayi serta membantu menurunkan Angka Kematian Ibu (AKI) 305/100.000 kelahiran hidup di Indonesia pada tahun 2015 dan Angka Kematian Bayi (AKB) 22,23/1.000 kelahiran hidup di Indonesia pada tahun 2015.

**Pelaksanaan:** pelaksanaan menggunakan observasional deskriptif dengan asuhan kebidanan menurut tujuh langkah varney data perkembangannya menggunakan SOAP. Asuhan komprehensif dilakukan sebanyak 14 kali kunjungan, hamil sebanyak 2 kali, persalinan 1 kali, nifas 4 kali, neonatus 5 kali dan Keluarga Berencana 2 kali kunjungan.

**Evaluasi:** setelah dilakukan asuhan pada Ny. V didapatkan hasil kondisi Ny. V adalah hamil normal, persalinan normal, nifas normal, bayi Ny. V normal dan Ny. V menggunakan KB suntik 3 bulan.

**Kesimpulan:** asuhan kebidanan *continuity of care* pada Ny. V tidak ditemukan masalah dan tidak terdapat kesenjangan antara praktik dan teori pada asuhan kehamilan hingga Keluarga Berencana. Diharapkan klien tetap menjaga kesehatan ibu, bayi dan lingkungan.

**Kata Kunci:** Asuhan Kebidanan, Berkelanjutan.

*ABSTRACT*

**Zuvita Alfiyani. R0314061. 2017. CONTINUITY OF CARE ON Mrs. V AGED 25 YEARS OLD AT COMMUNITY HEALTH CENTER OF GAMBISARI, SURAKARTA.** *The Study Program of Associate's Degree (Diploma III) Program in Midwifery Science, the Faculty of Medicine, Sebelas Maret University.*

**Scope:** *The comprehensive midwifery care on Mrs. V included antenatal, delivery, postpartum, neonatal, and family planning program cares in attempts to maintain the maternal and infant health and to decrease maternal mortality rate and infant mortality rate of 305/100,000 live births and 22,23/live births respectively in Indonesia in 2015.*

**Implementation:** *The continuity of care (COC) on Mrs. V used the descriptive observational implementation according to the Varney's Seven Steps, and the development data used SOAP. The comprehensive care was done for 14 visits: 2 visits during the antenatal care, 1 visit during the delivery care, 4 visits during the postpartum care, 5 visits during the neonatal care, and 2 visits during the family planning program care.*

**Evaluation:** *Following the implementation of the cares, Mrs. V had a normal gestation, a normal delivery, a normal postpartum, and a normal neonate, and she chose a three-monthly injection contraceptive for her family planning program.*

**Conclusion and Recommendation:** *Following the implementation of the COC on Mrs. V, there were not any problems and gaps between the theory and the practice from the gestation period to the family planning program period. The client was expected to preserve her own health and the health of her infant and environment.*

**Keywords:** *Midwifery care, continuity of care*
